

SERVICES

Healthcare & Daycare Facility Licensing

The Sandberg Phoenix Healthcare and Daycare Facility Licensing team represents clients through the process of an investigation and possible disciplinary hearings conducted by the Missouri Department of Health & Senior Services and the Missouri Department of Elementary and Secondary Education.

Often times an inquiry may start with a third-party complaint. We assist our clients through the state agency's investigation process in a manner that might prevent future disciplinary action. However, if this is not possible, we represent our clients in formal administrative proceedings to obtain the best possible result.
