

SERVICES

Health Care Regulatory & Compliance

Our Health Law practice group has represented numerous health care providers for over thirty years in defense of malpractice claims.

Based upon the strength and level of trust we've established with our clients, our non-litigation regulatory and health care consulting work has grown over the years. Our attorneys are committed to helping our clients reach their objectives in health care regulatory matters. As a collective resource, we are often turned to by medical and other professionals seeking advice on protecting the practices and businesses they have built.

We are skilled in risk consulting for a wide range of clients, including institutions, such as: hospitals, nursing homes, adult day cares, home health agencies and health care providers, including: physicians, physician groups, nurses and other medical professionals. Our attorneys regularly consult on contract, security, privacy, licensure and risk management matters.
