

INDUSTRIES

Construction & Development

We represent subcontractors, specialty contractors, suppliers, owners, developers, design professionals, general contractors, sureties and trade associations.

Our initial goal is conflict avoidance. When conflicts arise we are adept and skillful at negotiation, mediation, arbitration, litigation and appeals.

We actively participate in the construction industry throughout the country. We have presented countless seminars in more than a dozen states and provinces throughout the United States and Canada. In addition, we have prolifically and timely published articles on matters of interest to the construction industry.
